Subject: public comment on Yucca Mountain

Please enter this as a public comment:

- 1 I am against a waste depository at Yucca Mountain because of various reasons:
 - a.. The transport of nuclear waste across the US to that distant location is a public health threat.
 - 2 b.. Transport could be sabotaged from within the nuclear industry along the route.
 - 3 c.. Transport could be hijacked by nuclear terrorists.
 - 4 d.. Transport could meet with accidents due to traffic/weather conditions.
 - 5 e.. Any spill/accident would have long-term deadly consequences.
 - 6 f.. Native Americans are against the desecration of Yucca Mountain.
 - g.. The nuclear industry must be responsible for its own waste problem; to pass it off on to the taxpayers will further promote a dying, dangerous, and wasteful nuclear industry, which would not exist without tax subsidies.
 - h.. Yucca Mountain is the habitat of many endangered species, which will cease to exist if radiation poisoning occurs. Waste sites have historically become toxic wastelands.

Sincerely,
Kathryn A. Barnes
